

# Report on Recommendations to Change MIDs \*

**Douglas M. Gibler** *University of Alabama*

**Steven V. Miller** *Clemson University*

**Erin K. Little** *University of Alabama*

---

This is our report on Correlates of War (CoW) Militarized Interstate Disputes (MID) for which our project recommends changing a dispute from its original coding in the dataset. We offer both dispute-level and participant-level changes in this document. We further dichotomize our changes into both ‘major’ changes and ‘minor’ changes and offer some discussion of this classification as well. The report presents our changes in a table format in the document with the original coding alongside the corrected coding we provide. Table columns names are intuitively the original CoW column names and our corrections noted with c\_ beside them. Rows that are empty indicate no change between the original coding and our coding.

Additional information on the project can be found at <http://dmgibler.people.ua.edu/mid-data.html>. **Version:** 2.0. **Last updated:** August 30, 2017.

## Contents

<b>Dispute-level Changes</b>	<b>3</b>
Major Change: Start Years and End Years . . . . .	3
Major Change: Outcome and Settlement . . . . .	5
Major Change: Fatality and Fatality Counts . . . . .	13
Major Change: Hostility Levels . . . . .	19
Major Change: Reciprocation . . . . .	22
Major Change: Number of Participants . . . . .	26
Minor Change: Days and Months . . . . .	28
Minor Change: Highest Actions without Hostility Level Changes . . . . .	49
<b>Participant-level Changes</b>	<b>54</b>
Major Change: Start Years and End Years . . . . .	54
Major Change: Fatality and Fatality Counts . . . . .	58
Major Change: Hostility Levels . . . . .	65
Major Change: Side A . . . . .	73
Major Change: Wrong Participant . . . . .	80
Major Change: New Participant . . . . .	81
Minor Change: Days and Months . . . . .	81
Minor Change: Highest Actions without Hostility Level Changes . . . . .	103

## Dispute-level Changes

### Major Change: Start Years and End Years

The most common use of the Correlates of War (CoW) Militarized Interstate Dispute (MID) data might be in non-directed and directed dyad-year data sets that seek to model MID, fatal MID, or war onset as a function of various regressors (e.g. joint democracy, territorial claims, alliances, etc). Changes to start years and end years could have important implications for most research designs in this vein (e.g. [Senese and Vasquez, 2005](#); [Gibler, 2012](#); [Gibler and Miller, 2013](#)) and will also affect the “peace years” that researchers estimate (e.g. [Beck, Katz and Tucker, 1998](#); [Carter and Signorino, 2010](#)).

Table 1: Dispute-level: Changes to Start Years or End Years

*Major Change: Outcome and Settlement*

Conflict researchers also rely on the CoW-MID data to model the correlates of how disputes end (e.g. [Dixon and Senese, 2002](#); [Mousseau, 1998](#); [Miller and Gibler, 2011](#)). We consider changes to the outcomes of and settlements associated with these disputes to be major changes to the data.

Table 2: Dispute-level: Changes to Outcomes or Settlements

*Major Change: Fatality and Fatality Counts*

We offer substantial improvement in estimating the battle-related combat deaths in each MID. In several cases, we found fatal MIDs where CoW researchers could not or found that previously coded fatal MIDs actually had no fatalities. These changes could potentially influence the results of studies that use fatal MIDs as a benchmark between all MID onsets and war onset (e.g. [Hegre, 2000](#); [Oneal, Russett and Berbaum, 2003](#); [Pevehouse and Russett, 2006](#); [Gartzke, 2007](#)).

*Major Change: Hostility Levels*

Researchers in the past have also used the CoW-MID data to explain variation in dispute-level hostility (e.g. [Senese, 1996, 1997](#)). We consider the changes we make to dispute-level hostility to be “major” changes as a result.

*Major Change: Reciprocation*

Several influential studies use dispute-level reciprocation values in the CoW-MID data as a proxy for bargaining concepts like “audience costs” and “signaling” (e.g. [Weeks, 2008](#); [Horowitz, 2009](#); [Downes and Sechser, 2012](#)). The changes we report have major implications for some of these studies (see: [Gibler, Miller and Little, 2016](#)).

*Major Change: Number of Participants*

Most disputes in the data are bilateral. However, the expansion of disputes to multilateral, with more than one participant on either side, concerns scholars interested in dispute escalation or severity. We consider these to be major changes as a result.

Table 6: Dispute-level: Changes to the Number of Participants

*Minor Change: Days and Months*

The modal category of revisions to the data we recommend concern changes to days and months at the dispute-level that otherwise do not change the year the MID started or ended. These changes may concern studies that model MID duration in days (e.g. ?) but the changes ultimately constitute random noise. We consider these minor changes as a result.

Table 7: Dispute-level: Changes to Days or Months

*Minor Change: Highest Actions without Hostility Level Changes*

We recorded over 170 changes to the data in which we recommend correcting the highest militarized incident level even if this change did not affect the highest hostility level observed at the dispute-level. CoW's highest action variable implies a sense of order, certainly from one hostility level to the next, but intra-hostility level codings are ultimately nominal. We consider these changes to be minor.

Table 8: Dispute-level: Changes to Highest Action without Hostility Level Change

*Major Change: Wrong Participant*

Our review encountered several cases in which CoW identified the wrong participant in a dispute. There were multiple categories of mistaken identity in the CoW-MID data. CoW miscoded Niger as Nigeria in MID#4312 and miscoded Singapore as Malaysia in MID#2762. In the former case, the state names are similar enough to confuse a coder who entered 475 (Nigeria’s CoW code) instead of 436 (Niger’s CoW code). In the latter case, the CoW codes were close enough to where mistakenly entering 820 (Malaysia) instead of 830 (Singapore) is a plausible case of coder error.

Other cases of mistaken identity in the participant data are more nuanced. For example, CoW codes the United Kingdom as the target of MID#2338 because Venezuela seized a British ship (the Orinico). However, that British ship was from a company controlled almost completely by American stakeholders. The British purposely withheld a formal protest knowing the United States would ultimately protest on their behalf. The U.S. did, ultimately threatening force against Venezuela and later sending a battleship to the area of the seizure. Thus, the U.S. was the participant in the dispute that started over the seizure of a British ship.
